Ideation Phase
Define the Problem Statements

Date	25 October 2026
Team ID	Individual Project
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An EV market analyst	Understand overall EV market performance and compare sales across model years, market regions, and manufacturers	It takes time to connect the sales trend with the dashboard's other market measures	Sales, price, range, battery, and customer rating information is presented across different charts	I may miss important patterns when forming a market overview
PS-2	An EV market researcher	Compare vehicle price and range, battery degradation by battery type, and customer ratings by category and manufacturing country	It is difficult to review these measures together when comparing EV categories	Each measure answers a different question and needs its own chart or heatmap	I spend more time comparing results and may be less confident in my conclusions
